Introduction

Caribe zip is a vertical awning system composed of a special resistant and durable fabric, which is rolled and unrolled on aluminum side guides.

They effectively block direct solar radiation, reducing heat entry into interior spaces.

Characteristics

Energy savings

By reducing the need to use cooling systems, these system can help reduce energy costs.

Privacy

Horizontal and vertical zip provide privacy by blocking visibility from the outside.

Wind blocking

The zipper system keeps the fabric firmly in place, preventing the wind from causing it to flap or bang against the structure.

Durability

High-quality materials such as aluminum runners and heavy-duty fabric make these awnings durable and able to withstand adverse weather conditions.

Motorized

Allows you to control the awnings remotely through a switch or remote control.

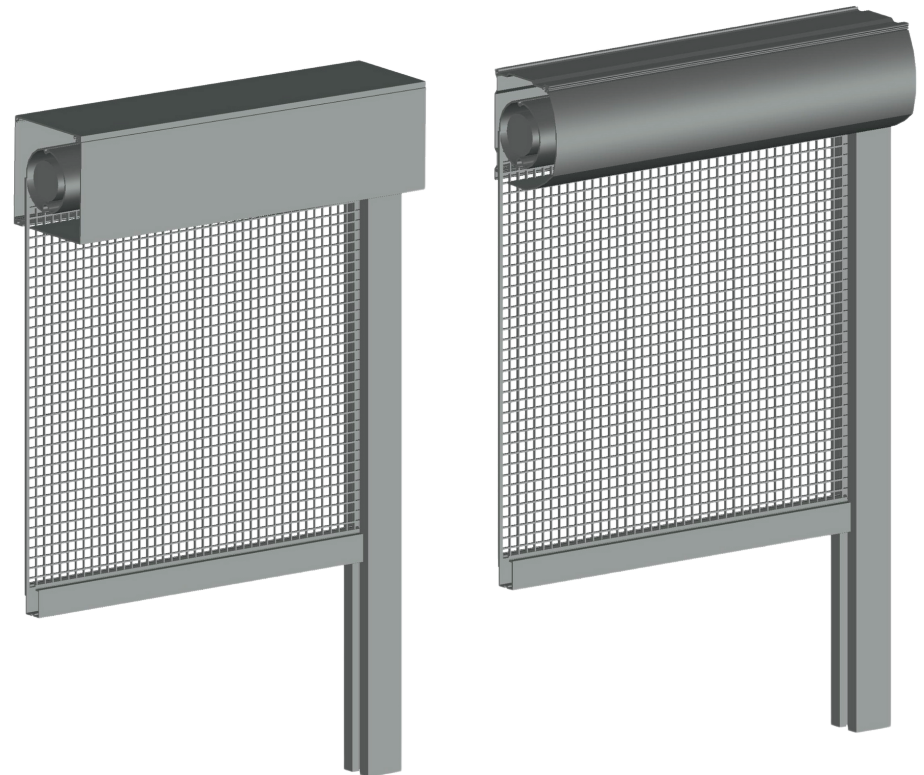

Tipology

SQUARE ZIP

- 100
- 130

ROUND ZIP

- 100
- 130

COMPONENTS OF ROUND ZIP 100

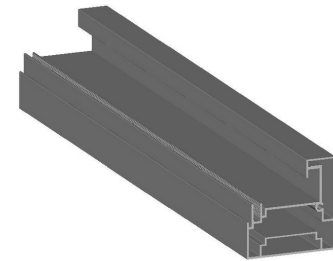

PZ015- BOX COVER FOR ZIP 100 REF:Z82239
