Introduction

The rolling garage door opens vertically and does not require much space in the garage. Thanks to this construction principle they provide maximum space, both inside and in front of the garage. It is composed of 77 slats.

Characteristics

High quality aluminum

Composed of high quality aluminum slats.

Optimal use of space

Our doors do not swing, providing more space inside and outside the garage.

Security

Obstacle recognition and insurance against rolling and falling. Avoid material and personal damage.

Easy access and easy to handle

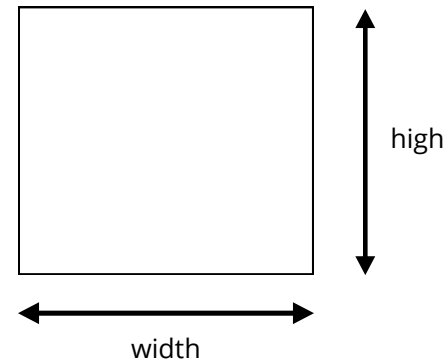

By push button or remote control.

Maximum dimensions

High: 3.000 mm

Width: 4.000 mm

Finishes

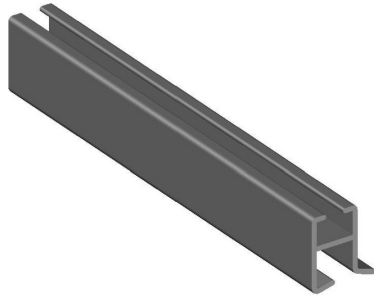

With a large selection of colors and special equipment, the door will be one of the personalized features of the house.

The available options are:

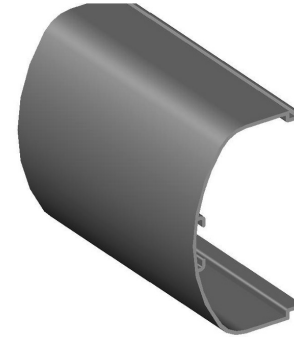

- Wide range of RAL colors.
- Different wood finishes.
- Anodized: silver, bronze and gold.
